Backend and AI developer with two internships and hands-on projects spanning enterprise pharma software, local LLM pipelines, and multimodal AI – research to deployment, built from scratch.

EXPERIENCE

ProvenTech (an NTT Data Company)

01/2026 – 04/2026

Trainee Consultant (Intern)

Hyderabad, India

- Resolved **20+ backend bugs across 3 Django REST API and Microservices modules** in a live enterprise LIMS serving Cipla, Lupin, Dr. Reddy's, and BioCon, sustaining stability of critical manufacturing integrations.
- Authored **10+ optimized SQL queries** cutting average retrieval time by **~30%**; cleaned **25+ duplicate/rogue entries** across SQL and MongoDB stores, improving accuracy for live pharma reporting pipelines.

Swecha

07/2024 – 10/2024

Machine Learning Intern

Hyderabad, India

- Built a Computer Vision and NLP **Telugu OCR pipeline** (Python, Tesseract, OpenCV) hitting **91% character accuracy** and 30% faster throughput; digitized 10,000+ archival documents.
- Co-developed **Chandamama Kathalu**, a fine-tuned Telugu LLM expanding digital accessibility for 5M+ native speakers.

PROJECTS

Project Sanjaya | Python, FastAPI, React, Llama-cpp, VLMs

- Built a Multi-model AI surveillance engine using **VLM and Computer Vision** that converts live video streams into queryable semantic text logs, eliminating long-term video storage while enabling **vector database backed retrieval across 2+ years** of activity.
- Exposed a real-time RAG interface over REST API (FastAPI); security summaries delivered on demand via Telegram.

VocalNote – AI PDF-to-Podcast Converter | Python, FastAPI, React, Kokoro TTS, Llama-cpp

- Officially recommended by the University IT Department**; adopted by **200+ students** within two weeks. Fully offline, zero-cloud LLM inference tool.
- End-to-end PDF-to-audio pipeline using local LLM inference, Prompt Engineering and Kokoro TTS; optimized for consumer hardware with **real-time generation and no GPU required**.

EDUCATION

Anurag University

2022 – 2026

B.Tech in Information Technology | CGPA: 7.6/10

Hyderabad, India

Certifications

Wipro TalentNext – Java Full Stack | Cisco CCNA 1–3 | Python Essentials 1 & 2 | Google ML Crash Course

SKILLS

Languages : Python, Java, C, JavaScript (Node.js), SQL, MongoDB, Bash/PowerShell

Frameworks & Web : Django, FastAPI, React.js, SpringBoot, Streamlit, n8n, WebSockets, RestAPI, Microservices

AI/ML & Data : PyTorch, TensorFlow, OpenCV, LangChain, LangGraph, Retrieval Augmented Generation, Large Language Model, Vector Database, Transformers, LLM Quantization, Fine-Tuning, Stable Diffusion, Scikit-learn, Pandas/NumPy, MCP, Computer Vision, Natural Language Processing, Prompt Engineering, Inference Optimization, Multimodal AI, Hugging Face, Generative AI

Tools : Git, GitHub, Docker, GitHub Actions, CI/CD, Agile/Scrum
